

"KIT KITCHEN" DISHWASHING UNIT

Access	The units are delivered by lorry with its own forklift to load and unload them. The units can be positioned into a marquee or building using the forklift and then can be moved into position by hand with pallet trucks provided by us. The units can only be moved by hand on a firm level base, it will not be possible to move them manually over a rough or grass surface.
Power	Each unit requires 1no. 32amp & 1no. 16amp single phase power. These can be from either the mains or a generator.
Water	A mains supply is preferable and we will connect to this, alternatively a suitable bowser.
Drainage	The units can gravity drain or pump to a suitable drain or tank.
Gas	No gas required for this unit
Dimensions	The largest component of the unit is 2440 (L) x 800(w) x 2200 (h)
Equipment	The Dishwashing Unit "Kit Kitchen" have as standard a large pot wash sink, pass through dish washer, pre-rinse spray, hot water heater, racking for dishwasher trays, cleans side and dirties side.
